Geography and History

2ºESO

What's bilingual education?

Bilingual education means that learners study typical school subjects – for example, maths or geography – through an additional language (such as English) and some subjects through their first language, or they may study the same subject through two languages.

This understanding of bilingual education is linked to other educational concepts such as Content and Language Integrated Learning (CLIL) and dual-language education.

Contents

History

- The fragmentation of the Ancient World.
- Early Middle Ages
- High Middle Ages
- Late Middle Ages
- Romanesque and Gothic art and culture

Contents
